REQUESTED ACTION: Variance to allow reduced building setbacks
HEARING DATE:

SUMMARY AND RECOMMENDATIONS:

The applicant is requesting 'blanket' variances to allow for reduced side yard setbacks and reduced rear yard setbacks. The purpose of the variances is to allow a more "traditional house style" than that which was originally contemplated when the CRG was approved.

The variances being requested can be best summarized as falling into 3 categories. The first category involves variances that would reduce the distances between side building faces. The applicant wishes to use the 20 foot side building separation presently required in the CMOP versus the old requirement which ranged between 18 feet and 40 feet (depending upon the height of adjoining structures and presence of windows). The purpose of this request is to use a standard setback so that the provision of windows and height of buildings will not necessitate in the creation of varying setbacks for each lot. The lot widths are simply too narrow to allow much flexibility once a building footprint has been selected.

366.ZAC/PZONE/ZAC1

Pg. 1

The second set of variances deals with porch and deck projections into the required yard areas. These types of projections cannot extend more than 25% into the required yard area. Given the fact that most decks usually extend at least 10 feet from the building, a minimum 40 foot rear yard would be required. The projection of porches into the front yard raises similar issues if decks were to be provided.

The third set of variances deals with buildings extending into the required rear yard area. Again this setback is variable under the old regulations, however, a window on the rear of the structure would necessitate in a 35 foot setback.

The Office of Planning and Zoning has met several times with the applicant. When the project was originally subdivided it was anticipated that modest homes would be placed on modest lots. The average lot size is approximately 60 feet by 85 feet. As the project proceeded with development, a series of "focus groups" were held with local residences (prospective buyers) to determine what types of building styles would appeal to the market. Based upon these preferences a particular building style was selected. The number of windows, and the architectural detail of this house style necessitated the request for variances.

The variances involving the distances between buildings is supportable based upon the extreme variation (18 feet to 40 feet) previously allowed. The height of structures and the presence of windows should not be the determining factor in the distances between the sides of buildings. The County is trying to encourage greater variation in architectural design and avoiding the use of blank walls.

The second set of variances dealing with decks and porches also transcends into the realm of architectural design. The intrusion of porches into the front should be viewed as a relief which adds diversity and interest to the street frontage. The provision of decks into the rear yard area where families enjoy private recreation should also be allowed. If a standard 30 foot rear yard is provided, a deck extending 10 to 12 feet into the yard area is acceptable.

Regarding the third set of variances dealing with rear yard setbacks, staff recommends that a minimum 30 foot rear yard be provided. Unless the rear yard area is highly designed with a privacy wall and landscaping, a standard 30 foot rear yard should be provided.

Based upon the Applicants request, staff recommends that variances for side yard setbacks, and porch and deck projections be APPROVED and that a minimum 30 foot rear yard setback be maintained. Those variances granted should be made subject to the following:

1. Prior to the issuance of building permits, the Office of Planning and Zoning shall review proposed building elevations to assure that the conceptual elevations and building footprints shown are those that are used.
2. A small lot-for use by the residents should be provided to help compensate for loss of some of the private yard areas which are generally used for active use.

Petition for Variance

Dear Mr. Cieski:

The Zoning Plans Advisory Committee (ZAC) has reviewed the plans submitted with the above referenced petition. The attached comments from each reviewing agency are not intended to indicate the appropriateness of the zoning action requested, but to assure that all parties, i.e., zoning commissioner, attorney and/or the petitioner, are made aware of plans or problems with regard to the proposed improvements that may have a bearing on this case.

Enclosed are all comments submitted thus far from the members of ZAC that offer or request information on your petition. If additional comments are received from other members of ZAC, I will forward them to you. Otherwise, any comment that is not informative will be placed in the hearing file. This petition was accepted for filing on March 28, 1994, and a hearing was scheduled accordingly.

The following comments are related only to the filing of future zoning petitions and are aimed at expediting the petition filing process with this office.

FINDINGS OF FACT AND CONCLUSIONS OF LAW

This matter comes before the Zoning Commissioner as a Petition for a Zoning Variance for the proposed subdivision known as Kenwood Park, located in the Kenwood section of Baltimore County. Blanket variance relief is requested for all 116 lots in this proposed townhouse community. In sum, the nature of the variances requested relate to required distances between side building faces, the required depth of porch and deck projections into the rear yards of the individual lots, and the length of building extensions into the rear yards.

The specific variances requested are as stated on Attachment A to the Petition. They are as follows:

1. From Section 301.1.A. and V.B.6.b. of the Baltimore County Zoning Regulations (BCZR) and the Comprehensive Manual of Development Policies (CMDP) to permit a deck to side property line as close as 4.5 ft. in lieu of 11.25 ft.;
2. From Section 301.1.A, V.B.6.b. and V.B.5.a. to permit a deck to rear property line or tract boundary as close as 10 ft., in lieu of 11.25 ft. or 26.25 ft.;
3. From Section 504.2 and V.B.3.b. to permit a distance between buildings at 20 ft. in lieu of 40 ft.;
4. From Section 504.2 and V.B.5.a. to permit window to tract boundary distances at 25 ft. and 30 ft. in lieu of 35 ft.;

5. From Section 504.2 and V.B.6.a. to permit a 15 ft. window to proposed R/W setback in lieu of 25 ft.;
6. From Section 504.2 (V.B.6.b.) to permit a 10 ft. window to property line setback in lieu of 15 ft.; and,
7. From Section 504.2 (V.B.6.c.) to permit a 20 ft. distance between windows in lieu of 40 ft.

All of the relief requested is more particularly shown on the site plan, submitted as Petitioner's Exhibit No. 1. This plan was submitted at the public hearing held on this case and was prepared by Thomas A. Church, Professional Engineer. The 3 page site plan clearly depicts the subject property, the proposed residential development thereon and provides an itemization of the variances required for each lot. That site plan and the information thereon is hereby referenced and incorporated herein.

The uncontradicted testimony and evidence presented in this case provided by Thomas E. Carski, a partner of Kenwood Park Joint Venture, property owners. The site is owned by that partnership which proposes residential development as outlined above.

As noted above, 116 townhouse units are proposed. The site is comprised of approximately 33.695 acres and is split zoned D.R.3.5 and D.R.5.5. The predominant zoning is D.R.5.5 (31.847 acres) with but a small portion of D.R.3.5 (1.848 acres). As is the case with all petitions for variance filed with this office, the Petition and plan underwent the review of the Zoning Plans Advisory Committee (ZAC). That committee, which is comprised of numerous agencies within the County, reviewed the Petition and provided this Zoning Commissioner with written comment therein. A comprehensive comment was offered by the Office of Planning and Zoning (OPZ). I have reviewed that comment and concur with many of the

conclusions therein. The blanket variances which are requested are clearly appropriate in this instance. They will allow the applicant to develop in an esthetically pleasing manner which will be attractive to potential buyers. In fact, Mr. Carski observed at the public hearing that focus group meetings were held by his company to ascertain the desires of the potential market. These meetings clearly showed that potential buyers prefer windows, porches, garages and other amenities which would not be allowed if strict adherence to the relevant provisions of the BCZR and CMDP were observed. Within OPZ's comment, staff recommends approval of the requested variances to promote greater variation and architectural design and esthetically pleasing development.

Although OPZ recommended approval of the subject variances, they suggested that certain restrictions be imposed. One of the restrictions requests that OPZ be afforded the opportunity to review proposed building elevations to ensure that the conceptual elevations and building footprints shown are used. I will incorporate that restriction in my order in that same is appropriate.

The second requested restriction is that a small tot lot for use of the residents be provided to help compensate for loss of some of the private yard areas which are generally used for active use. I decline to incorporate such a restriction. My decision in this respect is based largely on the fact that the Shady Springs Elementary School is immediately next to this property. That site offers a large amenity area which will, no doubt, be used utilized by the residents of this community. A small tot lot does not seem necessary.

An area variance may be granted where strict application of the zoning regulations would cause practical difficulty to the Petitioner and his

property. McLean v. Soley, 270 Md. 208 (1973). To prove practical difficulty for an area variance, the Petitioner must meet the following:

- 1) whether strict compliance with requirement would unreasonably prevent the use of the property for a permitted purpose or render conformance unnecessarily burdensome;
- 2) whether the grant would do substantial injustice to applicant as well as other property owners in the district or whether a lesser relaxation than that applied for would give substantial relief; and
- 3) whether relief can be granted in such fashion that the spirit of the ordinance will be observed and public safety and welfare secured.

Anderson v. Bd. of Appeals, Town of Chesapeake Beach, 22 Md. App. 28 (1974).

It is clear from the testimony that if the variances are granted, such use, as proposed, will not be contrary to the spirit of the B.C.Z.R. and will not result in any injury to the public good.

After due consideration of the testimony and evidence presented, it is clear that a practical difficulty or unreasonable hardship will result if the variances are not granted. It has been established that special circumstances or conditions exist that are peculiar to the land or structure which is the subject of the variances requested, and that the requirements from which the Petitioner seeks relief will unduly restrict the use of the land due to the special conditions unique to this particular parcel. In addition, the variances requested will not cause any injury to the public health, safety and general welfare. Further, granting of the variances will be in strict harmony with the spirit and intent of the B.C.Z.R.

IT IS FURTHER ORDERED that a variance from Section 504.2 (V.B.6.b.) to permit a 10 ft. window to property line setback in lieu of 15 ft., be and is hereby GRANTED; and,

IT IS FURTHER ORDERED that a variance from Section 504.2 (V.B.6.c.) to permit a 20 ft. distance between windows, in lieu of 40 ft., be and is

hereby GRANTED, subject, however, to the following restrictions which are conditions precedent to the relief granted herein:

1. The Petitioner is hereby made aware that proceeding at this time is at its own risk until such time as the 30 day appellate process from this Order has expired. If, for whatever reason, this Order is reversed, the Petitioner would be required to return, and be responsible for returning, said property to its original condition.

2. The Office of Planning and Zoning shall be afforded the opportunity, prior to the issuance of building permits, to review proposed building elevations to ensure that the conceptual elevations and building footprints shown are used.

REQUESTED ACTION: Variance to allow reduced building setbacks
HEARING DATE:

SUMMARY AND RECOMMENDATIONS:

The applicant is requesting 'blanket' variances to allow for reduced side yard setbacks and reduced rear yard setbacks. The purpose of the variances is to allow a more "traditional house style" than that which was originally contemplated when the CRG was approved.

The variances being requested can be best summarized as falling into 3 categories. The first category involves variances that would reduce the distances between side building faces. The applicant wishes to use the 20 foot side building separation presently required in the CMOP versus the old requirement which ranged between 18 feet and 40 feet (depending upon the height of adjoining structures and presence of windows). The purpose of this request is to use a standard setback so that the provision of windows and height of buildings will not necessitate in the creation of varying setbacks for each lot. The lot widths are simply too narrow to allow much flexibility once a building footprint has been selected.

366.ZAC/PZONE/ZAC1

Pg. 1

The second set of variances deals with porch and deck projections into the required yard areas. These types of projections cannot extend more than 25% into the required yard area. Given the fact that most decks usually extend at least 10 feet from the building, a minimum 40 foot rear yard would be required. The projection of porches into the front yard raises similar issues if decks were to be provided.

The third set of variances deals with buildings extending into the required rear yard area. Again this setback is variable under the old regulations, however, a window on the rear of the structure would necessitate in a 35 foot setback.

The Office of Planning and Zoning has met several times with the applicant. When the project was originally subdivided it was anticipated that modest homes would be placed on modest lots. The average lot size is approximately 60 feet by 85 feet. As the project proceeded with development, a series of "focus groups" were held with local residences (prospective buyers) to determine what types of building styles would appeal to the market. Based upon these preferences a particular building style was selected. The number of windows, and the architectural detail of this house style necessitated the request for variances.

The variances involving the distances between buildings is supportable based upon the extreme variation (18 feet to 40 feet) previously allowed. The height of structures and the presence of windows should not be the determining factor in the distances between the sides of buildings. The County is trying to encourage greater variation in architectural design and avoiding the use of blank walls.

The second set of variances dealing with decks and porches also transcends into the realm of architectural design. The intrusion of porches into the front should be viewed as a relief which adds diversity and interest to the street frontage. The provision of decks into the rear yard area where families enjoy private recreation should also be allowed. If a standard 30 foot rear yard is provided, a deck extending 10 to 12 feet into the yard area is acceptable.

Regarding the third set of variances dealing with rear yard setbacks, staff recommends that a minimum 30 foot rear yard be provided. Unless the rear yard area is highly designed with a privacy wall and landscaping, a standard 30 foot rear yard should be provided.

Based upon the Applicants request, staff recommends that variances for side yard setbacks, and porch and deck projections be APPROVED and that a minimum 30 foot rear yard setback be maintained. Those variances granted should be made subject to the following:

1. Prior to the issuance of building permits, the Office of Planning and Zoning shall review proposed building elevations to assure that the conceptual elevations and building footprints shown are those that are used.
2. A small lot-for lot for use by the residents should be provided to help compensate for loss of some of the private yard areas which are generally used for active use.

Petition for Variance

Dear Mr. Cieski:

The Zoning Plans Advisory Committee (ZAC) has reviewed the plans submitted with the above referenced petition. The attached comments from each reviewing agency are not intended to indicate the appropriateness of the zoning action requested, but to assure that all parties, i.e., zoning commissioner, attorney and/or the petitioner, are made aware of plans or problems with regard to the proposed improvements that may have a bearing on this case.

Enclosed are all comments submitted thus far from the members of ZAC that offer or request information on your petition. If additional comments are received from other members of ZAC, I will forward them to you. Otherwise, any comment that is not informative will be placed in the hearing file. This petition was accepted for filing on March 28, 1994, and a hearing was scheduled accordingly.

The following comments are related only to the filing of future zoning petitions and are aimed at expediting the petition filing process with this office.

- The director of Zoning Administration and Development Management has instituted a system whereby seasoned zoning attorneys who feel that they are capable of filing petitions that comply with all aspects of the zoning regulations and petitions filing requirements can file their petitions with this office without the necessity of a preliminary review by zoning personnel.

FINDINGS OF FACT AND CONCLUSIONS OF LAW

This matter comes before the Zoning Commissioner as a Petition for a Zoning Variance for the proposed subdivision known as Kenwood Park, located in the Kenwood section of Baltimore County. Blanket variance relief is requested for all 116 lots in this proposed townhouse community. In sum, the nature of the variances requested relate to required distances between side building faces, the required depth of porch and deck projections into the rear yards of the individual lots, and the length of building extensions into the rear yards.

The specific variances requested are as stated on Attachment A to the Petition. They are as follows:

1. From Section 301.1.A. and V.B.6.b. of the Baltimore County Zoning Regulations (BCZR) and the Comprehensive Manual of Development Policies (CMDP) to permit a deck to side property line as close as 4.5 ft. in lieu of 11.25 ft.;
2. From Section 301.1.A, V.B.6.b. and V.B.5.a. to permit a deck to rear property line or tract boundary as close as 10 ft., in lieu of 11.25 ft. or 26.25 ft.;
3. From Section 504.2 and V.B.3.b. to permit a distance between buildings at 20 ft. in lieu of 40 ft.;
4. From Section 504.2 and V.B.5.a. to permit window to tract boundary distances at 25 ft. and 30 ft. in lieu of 35 ft.;

5. From Section 504.2 and V.B.6.a. to permit a 15 ft. window to proposed R/W setback in lieu of 25 ft.;
6. From Section 504.2 (V.B.6.b.) to permit a 10 ft. window to property line setback in lieu of 15 ft.; and,
7. From Section 504.2 (V.B.6.c.) to permit a 20 ft. distance between windows in lieu of 40 ft.

All of the relief requested is more particularly shown on the site plan, submitted as Petitioner's Exhibit No. 1. This plan was submitted at the public hearing held on this case and was prepared by Thomas A. Church, Professional Engineer. The 3 page site plan clearly depicts the subject property, the proposed residential development thereon and provides an itemization of the variances required for each lot. That site plan and the information thereon is hereby referenced and incorporated herein.

The uncontradicted testimony and evidence presented in this case provided by Thomas E. Carski, a partner of Kenwood Park Joint Venture, property owners. The site is owned by that partnership which proposes residential development as outlined above.

As noted above, 116 townhouse units are proposed. The site is comprised of approximately 33.695 acres and is split zoned D.R.3.5 and D.R.5.5. The predominant zoning is D.R.5.5 (31.847 acres) with but a small portion of D.R.3.5 (1.848 acres). As is the case with all petitions for variance filed with this office, the Petition and plan underwent the review of the Zoning Plans Advisory Committee (ZAC). That committee, which is comprised of numerous agencies within the County, reviewed the Petition and provided this Zoning Commissioner with written comment therein. A comprehensive comment was offered by the Office of Planning and Zoning (OPZ). I have reviewed that comment and concur with many of the

conclusions therein. The blanket variances which are requested are clearly appropriate in this instance. They will allow the applicant to develop in an esthetically pleasing manner which will be attractive to potential buyers. In fact, Mr. Carski observed at the public hearing that focus group meetings were held by his company to ascertain the desires of the potential market. These meetings clearly showed that potential buyers prefer windows, porches, garages and other amenities which would not be allowed if strict adherence to the relevant provisions of the BCZR and CNDP were observed. Within OPZ's comment, staff recommends approval of the requested variances to promote greater variation and architectural design and esthetically pleasing development.

Although OPZ recommended approval of the subject variances, they suggested that certain restrictions be imposed. One of the restrictions requests that OPZ be afforded the opportunity to review proposed building elevations to ensure that the conceptual elevations and building footprints shown are used. I will incorporate that restriction in my order in that same is appropriate.

The second requested restriction is that a small tot lot for use of the residents be provided to help compensate for loss of some of the private yard areas which are generally used for active use. I decline to incorporate such a restriction. My decision in this respect is based largely on the fact that the Shady Springs Elementary School is immediately next to this property. That site offers a large amenity area which will, no doubt, be used utilized by the residents of this community. A small tot lot does not seem necessary.

An area variance may be granted where strict application of the zoning regulations would cause practical difficulty to the Petitioner and his

property. McLean v. Soley, 270 Md. 208 (1973). To prove practical difficulty for an area variance, the Petitioner must meet the following:

- 1) whether strict compliance with requirement would unreasonably prevent the use of the property for a permitted purpose or render conformance unnecessarily burdensome;
- 2) whether the grant would do substantial injustice to applicant as well as other property owners in the district or whether a lesser relaxation than that applied for would give substantial relief; and
- 3) whether relief can be granted in such fashion that the spirit of the ordinance will be observed and public safety and welfare secured.

Anderson v. Bd. of Appeals, Town of Chesapeake Beach, 22 Md. App. 28 (1974).

It is clear from the testimony that if the variances are granted, such use, as proposed, will not be contrary to the spirit of the B.C.Z.R. and will not result in any injury to the public good.

After due consideration of the testimony and evidence presented, it is clear that a practical difficulty or unreasonable hardship will result if the variances are not granted. It has been established that special circumstances or conditions exist that are peculiar to the land or structure which is the subject of the variances requested, and that the requirements from which the Petitioner seeks relief will unduly restrict the use of the land due to the special conditions unique to this particular parcel. In addition, the variances requested will not cause any injury to the public health, safety and general welfare. Further, granting of the variances will be in strict harmony with the spirit and intent of the B.C.Z.R.

hereby GRANTED, subject, however, to the following restrictions which are conditions precedent to the relief granted herein:

1. The Petitioner is hereby made aware that proceeding at this time is at its own risk until such time as the 30 day appellate process from this Order has expired. If, for whatever reason, this Order is reversed, the Petitioner would be required to return, and be responsible for returning, said property to its original condition.

2. The Office of Planning and Zoning shall be afforded the opportunity, prior to the issuance of building permits, to review proposed building elevations to ensure that the conceptual elevations and building footprints shown are used.
